## SERIAL KILLER

Garry Johnson, £9.99

**TAYLOR SHELLEY** believes in retribution and the eight teen boys that ruined her life have to pay – with their lives.

As she picks them off one by one in a brutal fashion, she begins to feel a little better.

In a mere six weeks, she kills eight times.

But her final victim – a bent politician – will suffer the most for his crimes.

Johnson wrote this novel under doctor's orders.

He had suffered five heart attacks and spent months in rehab and was told that writing would help his recovery. It has.

The book is already being optioned for the big screen and you can certainly see why.

It's fast, furious and original.
